Propress Steamers, for so many years have been in daily use: in the smallest boutiques to the worlds leading fashion names in retail chains and department stores: to front stage curtains and Royal Palaces, steaming today's manmade micro fibres through to precious antique yarns.

Propress, your partner for perfect presentation.

Steaming clothes and curtains vertically is simple, hanging in their natural form. Propress' gentle steam instantly removes creases and wrinkles putting life back into fabrics, however delicate and intricate, always achieving a perfect finish. That finishing touch enables soft furnishings to be dressed on site to perfection, projecting a caring image to your client. The job is complete.

Nobody ever regretted buying Quality.

Propress Steamers are of unmatched quality, safety and performance. Made in Great Britain. Fit for Purpose in any environment using any quality of tap water. Stable and secure, ergonomically designed, lightweight and durable. New lightweight aluminium steam nozzle designed to form and shape simultaneously performs as a low temperature iron.

Propress: Communicating Quality with your Customers

The worlds most advanced range of commercial fabric Steamersand the most cost effective!

Better Presentation Leads To Better Sales

Viva Model MD 270 series

Two Litre water capacity gives over 60 minutes of constant steam operation. Powerful 1500 Watt heating element for rapid steam up, with electronic control and safety system.

Clipper Model MD 450 series

Four Litre water capacity gives over 125 minutes of constant steam with more powerful 1750 Watt heating element, plus Instant Steam STANDBY SYSTEM. This model is designed for twenty four hour constant use – always ready to provide instant steam when switched from Standby to Steam. Fully electronic.

Domestic and Office:

Personal wardrobe; curtains and furnishings; carpet pressure marks.

The Propress Steam Nozzle

Engineered in lightweight polished alloy, gives incomparable performance and results (unlike plastic nozzles that spit and damage due to insufficient heat, and may shatter with impact).

Propress steam cannot scorch or burn even the most delicate of fabrics, from nylon to the finest of silks, and is totally safe on appliqués, embroidery, beading and transfers, rejuvenating natural fibres and pile fabrics such as velvets.
